PRODUCTION CHARACTERISTICS

HARVEST

The grape harvest starting from mid-august, and in the early morning hours. The first selection of the grapes takes place in the field, where are picking only the best bunches in boxes of a maximum of 18 kg, to prevent the weight of the grapes from breaking the berries. The second selection of the grapes takes place in the cellar, followed by a soft pneumatic pressing.

FERMENTATION

The fermentation is carried out at low temperatures, enhancing the characteristics of the grapes to the fullest.

REFINEMENT

The refinement takes place before the tirage and is carried out in steel tanks for about 7 months, in which the yeasts are put back in suspension to give the wines gustatory and aromatic complexity. The tirage takes places in spring.

AGING

It ages for at least 28 months on the lees inside air-conditioned rooms. During this period are manually repeated some bâtonnage which will characterize the gustatory and olfactory profile of Franciacorta.
